### Description

This Standard specifies essential safety requirements for air break switches for approval and test purposes.

It is intended to be read in conjunction with AS/NZS 3100. Reprinted to incorporate Amendment 1:2005.

### Scope

This Standard applies to air break switches having current ratings not exceeding 125A for use in electrical circuits and equipment operating at low voltage but not exceeding 500V and intended for household or similar use and for use in indoor and outdoor electrical installations.

This Standard does not apply to cord-line switches, as defined in AS/NZS 3127.
