Description

This Standard specifies requirements for the design and installation of sanitary plumbing and sanitary drainage, from the fixtures to a sewer, common effluent system or on-site disposal system, as appropriate.

The Standard applies to new installations as well as alterations, additions, or repairs to existing installations.

Reprinted to incorporate Amendments 1 and 2.

Scope

Construction of a sanitary plumbing and drainage installation in accordance with this Standard is deemed to satisfy the requirements of AS 3500.2.1.

The Standard applies to new installations as well as alterations, additions or repairs to existing installations. Illustrations used in this Standard are diagrammatic only and have been chosen without prejudice.
