Description

This Standard sets out requirements applying to verification of compliance of calculated or measured values of lighting parameters, from interior and exterior lighting systems, with specified or target values for these parameters.

The requirements are the minimum considered necessary to ensure that calculated or measured values of lighting parameters are of an acceptable accuracy.

For assistance with locating previous versions, please contact the information provider.

Table of Contents

Section 1 Scope And General

1.1 Scope

1.2 Application

1.3 Referenced Documents

1.4 Definitions

1.5 Basis Of Compliance

Section 2 Uncertainty In Lighting Design And Measurement

2.1 Rounding Of Calculation Results And Light Measurements

2.2 Treatment Of Indeterminate Values In Measurement

Section 3 Input Information

3.1 Manufacture Of Lighting Equipment

3.2 Lamp And Luminaire Photometric Data

Section 4 Design Methods And Sensitivities

4.1 Calculation Methods

4.2 Design Assumptions

4.3 Maintenance Assumptions

Section 5 Design Documentation

5.1 Information On Design Basis

5.2 Installation Documentation

5.3 Information For The Client

Section 6 Installation

6.1 Evaluation Of Proposed Alterations

Section 7 Verification

7.1 Methods Of Verification

7.2 Verification Based On Lighting Calculations

7.3 Verification Based On Lighting Measurements

Section 8 Lighting System Management

Section 9 Expected Accuracies
