Description

This part of AS/NZS 60335 deals with the safety of electric instantaneous water heaters for household and similar purposes and intended for heating water below boiling temperature, their rated voltage being not more than 250 V for single-phase appliances and 480 V for other appliances. Instantaneous water heaters incorporating bare heating elements are within the scope of this standard. Identical to, but **does not include the text of, IEC 60335.2.35 Ed.5.**
