## ASTM A105/A105M-86A Standard Specification for Forgings, Carbon Steel, for Piping Components

[View on Information Provider website](#)

### Abbreviation

ASTM A105/A105M-86A

### Valid from

29/08/1986

---

### Information provider

IHS Markit

### Author

American Society of Testing and Materials

### Information type

ASTM Standard

### Format

PDF

---

### Cited By

[This resource is cited by 1 document \(show Citations\)](#)

---

### Description

This specification covers forged carbon steel piping components for ambient- and higher-temperature service in pressure systems.

Forgings made to this specification are limited to a maximum weight of 10 000 lb [4540 kg].

### Scope

Tubesheets and hollow cylindrical forgings for pressure vessel shells are not included within the scope of this specification. Although this specification covers some piping components machined from rolled bar and seamless tubular products, it does not cover raw material produced in these product forms.
