## ASTM A182 - 78 Specification for Forged or Rolled Alloy-Steel Pipe Flanges, Forged Fittings, and Valves and Parts for High-Temperature Service

[View on Information Provider website](#)

### Abbreviation

ASTM A182 - 78

### Valid from

28/07/1978

---

### Information provider

IHS Markit

### Author

American Society of Testing and Materials

### Information type

ASTM Standard

### Format

PDF, Hard copy

---

### Cited By

### Description

This specification covers forged low alloy and stainless steel piping components for use in pressure systems. Included are flanges, fittings, valves, and similar parts to specified dimensions or to dimensional standards such as the ANSI specifications that are referenced in Section 2.

Other forgings for other applications may be made to this specification.

Thirty-three grades are covered including sixteen ferritic or martensitic steels and seventeen austenitic stainless steels. Selection will depend upon design and service requirements.

Supplementary requirements are provided for use when additional testing or inspection is desired. These shall apply only when specified individually by the purchaser in the order.

Note 1 - The values stated in the U.S. customary units are to be regarded as the standard.

For assistance with locating previous versions, please contact the information provider.
