ASTM A216/A216M-84B Standard Specification for Steel Castings, Carbon, Suitable for Fusion Welding, for High Temperature Service

[View on Information Provider website](#)

Abbreviation

ASTM A216/A216M-84B

Version

Revision 84B

Valid from

01/01/1984

Information provider

IHS Markit

Author

American Society of Testing and Materials

Information type

ASTM Standard

Format

PDF, Hard copy

Cited By

Description

This specification covers carbon steel castings for valves, flanges, fittings, or other pressure-containing parts for high-temperature service and of quality suitable for assembly with other castings or wrought-steel parts by fusion welding.

Three grades, WCA, WCB, and WCC, are covered in this specification. Selection will depend upon design and service conditions, mechanical properties, and the high temperature characteristics.
