ASTM A352/A352M-85 STANDARD SPECIFICATION FOR STEEL CASTINGS, FERRITIC AND MARTENSITIC, FOR PRESSURE CONTAINING PARTS, SUITABLE FOR LOW TEMPERATURE SERVICE

[View on Information Provider website](#)

Abbreviation

ASTM A352/A352M-85

Valid from

01/01/1985

Information provider

IHS Markit

Author

American Society of Testing and Materials

Information type

ASTM Standard

Format

PDF, Hard copy

Cited By

[This resource is cited by 1 document \(show Citations\)](#)

Description

This specification covers steel castings for valves, flanges, fittings, and other pressure-containing parts intended primarily for low-temperature service.

Several grades of ferritic steels and one grade of martensitic steel are covered. Selection of analysis will depend on design and service conditions. The temperature shown is the lowest temperature at which the material ordinarily is required to meet the impact requirements of this specification.

Users should note that hardenability of some of the grades mentioned may restrict the maximum size at which the required mechanical properties are obtainable.
