Description

This guide covers the packaging, marking, and loading of steel products for shipment.

Assuming proper handling in transit, this guide is intended to assist shippers in packaging and loading steel products to arrive at their destination safely and in good condition.

It is also intended that this guide may be used for attaining uniformity, simplicity, sufficiency, and economy in the shipment of steel products.

This guide applies to semi-finished steel products, bars, structural shapes and sheet piling, rods, wire and wire products, tubular products, plates, sheets, and strips, tin mill products, and castings.

Scope

For assistance with locating previous versions, please contact the information provider.
