ASTM A751 - 96 Standard Test Methods, Practices, and Terminology for Chemical Analysis of Steel Products

[View on Information Provider website](#)

Abbreviation

ASTM A751 - 96

Valid from

10/09/1996

Information provider

American Society of Testing and Materials

Author

American Society of Testing and Materials

Information type

ASTM Standard

Format

PDF, Hard copy

Cited By

[This resource is cited by 1 document \(show Citations\)](#)

Description

This standard covers definitions, reference methods, practices, and guides relating to the chemical analysis of steel, stainless steel, and related alloys. It includes both wet chemical and instrumental techniques.

Directions are provided for handling chemical requirements, product analyses, residual elements, and reference standards, and for the treatment and reporting of chemical analysis data.

This standard applies only to those product standards which include this standard or parts thereof as a requirement.

In cases of conflict, the product specification requirements shall take precedence over the requirements of this standard.

Attention is directed to Practice A880 when there may be a need for information on criteria for evaluation of testing laboratories.

This standard does not purport to address all of the safety concerns, if any, associated with its use. It is the responsibility of the user of this standard to establish appropriate safety and health practices and determine the applicability of regulatory limitations prior to use.

Scope

For assistance with locating previous versions, please contact the information provider.

Notes/comments

API SPEC 5L-1991 cites ASTM A751:the prevoius to 1991 version, which is not currently available online. We have provided you with a link to this more recent version for your information only.
