### Description

This specification establishes requirements for a high-grade steam-metal or valve-bronze alloy (Copper Alloy UNS No. C92200) used for component castings of valves, flanges, and fittings.

The castings covered are used in products that may be manufactured in advance and supplied from stock by the manufacturer or other dealer.

The values stated in inch-pound units are to be regarded as the standard. Metric values given in parenthesis are for information only.

For assistance with locating previous versions, please contact the information provider.
