Description

This specification covers minimum requirements for bonding compounds for adhering interior gypsum plaster to structurally sound surfaces.

Scope

This specification covers minimum requirements for bonding compounds for adhering interior gypsum plaster to structurally sound surfaces.

This specification also covers test methods for determining performance requirements and physical properties.

The values stated in inch-pound units are to be regarded as the standard. The SI equivalents of inch-pound units are approximate.

The following safety hazards caveat pertains only to the test methods described in this specification: This standard does not purport to address all of the safety concerns, if any, associated with its use. It is the responsibility of the user of this standard to establish appropriate safety and health practices and determine the applicability of regulatory limitations prior to use.

For assistance with locating previous versions, please contact the information provider.
