**Description**

This practice covers a list of standard temperatures from which selection may be made for any specific test or test method.

**Scope**

This practice covers a list of standard temperatures from which selection may be made for any

specific test or test method. Any standard or specification that specifies test temperatures not listed shall take precedence over this practice.

These temperatures do not apply to mixing, processing, or vulcanizing temperatures for rubber compounds. Any standard requiring preparation of a particular rubber compound should specify the conditions to be used.

The values stated in SI units are to be regarded as the standard. The values given in parentheses are for information only.

This standard does not purport to address all of the safety problems, if any, associated with its use. It is the responsibility of the user of this standard to establish appropriate safety and health practices and determine the applicability of regulatory limitations prior to use.
