ASTM D3029-95 Test methods for impact resistance of flat rigid plastic specimens by means of a tup (falling weight)

[View on Information Provider website](#)

Abbreviation

ASTM D3029-95

Valid from

15/06/1994

Information provider

IHS Markit

Author

American Society for Testing and Materials

Information type

ASTM Standard

Format

PDF

Cited By

Description

These test methods cover the determination of the relative ranking of materials according to the energy required to crack or break flat, rigid plastic specimens under various specified conditions of impact of a free-falling tup or weight.

Scope

The values stated in SI units are to be regarded as the standard. The values given in parentheses are for information only.

This standard does not purport to address all of the safety concerns, if any, associated with its use. It is the responsibility of the user of this standard to establish appropriate safety and health practices and determine the applicability of regulatory limitations prior to use. Specific hazards statements are given in Section 8.

For assistance with locating previous versions, please contact the information provider.

Notes/comments

This Standard is referenced by AS/NZS 1546.1:2008 in regard to septic tanks.
