ASTM D412 - 98a(2002)e1 Standard Test Methods for Vulcanized Rubber and Thermoplastic Elastomers—Tension

[View on Information Provider website](#)

Abbreviation

ASTM D412 - 98a(2002)e1

Valid from

27/01/2003

Information provider

American Society of Testing and Materials

Author

American Society of Testing and Materials

Information type

ASTM Standard

Format

PDF

Cited By

Description

These test methods cover procedures used to evaluate the tensile (tension) properties of vulcanized thermoset rubbers and thermoplastic elastomers.

These methods are not applicable to ebonite and similar hard, low elongation materials.

The methods appear as follows:

- Test Method A - Dumbell and straight section specimens
- Test Method B - Cut ring specimens
