Description

This test method is intended for use on any petroleum product.

Scope

This test method is intended for use on any petroleum product. A procedure suitable for black specimens, cylinder stock, and nondistillate fuel oil is described in . A procedure for testing the fluidity of a residual fuel oil at a specified temperature is described in the appendix.

This standard does not purport to address all of the safety concerns, if any, associated with its use. It is the responsibility of the user of this standard to establish appropriate safety and health practices and determine the applicability of regulatory limitations prior to use. For specific hazard statements, see Section 7.
