AWS C1.3:1970 Recommended Practices For Resistance Welding Coated Low Carbon Steels

[View on Information Provider website](#)

Abbreviation

AWS C1.3:1970

Valid from

01/01/1970

Information provider

American Welding Society

Author

American Welding Society

Information type

Technical recommendation

Format

PDF

Cited By

[This resource is cited by 1 document \(show Citations\)](#)

Description

The data contained in these recommended practices apply to the types of coated steels and the thickness ranges shown in the respective tables. Specific welding requirements of zinc, aluminum, lead, nickel, tin, copper, cadmium, and chromium coated low carbon steel AISI 1010 are presented in the respective sections.

For assistance with locating previous versions, please contact the information provider.
