Description

This standard establishes minimum requirements for cold-applied petrolatum tape and petroleum wax tape coatings used for the exterior of connections and fittings for steel water pipelines.

Scope

This standard describes the exterior coatings that consist of cold-applied petrolatum or petroleum wax primer, petrolatum or petroleum wax saturated tape coatings, and their application to special sections, connections, and fittings to be used with buried, submerged, and aboveground steel water pipelines.

For assistance with locating previous versions, please contact the information provider.

Notes/comments

This Standards is superseded by AWWA C217:2016
