Description

The Standards cited in this Verification Method provided a means for the design of structures to meet the performance requirements of New Zealand Building Code Clause B1 Structure.

For any particular building or building design, the Verification Method consisted of AS/NZS 1170 used in conjunction with the relevant cited material standards as modified by this Verification Method.

Scope

The citation covered only the scope stated or implicit in each Standard. Aspects outside the scope, when applied to a particular building, were not part of the Verification Method.
