BIM - looking beyond design - Build 166 (2018)

[View on Information Provider website](#) [Download this resource \(PDF, 1.0MB\)](#)

{{ linkText }}

Abbreviation

BIM - looking beyond design - Build 166 (2018)

Valid from

01/06/2018

Information provider

BRANZ Limited

Information type

BUILD article

Format

Website, PDF

Description

Ignite Director Adam Taylor, urges architects to embrace all the possibilities of BIM. Those who don't might just get left behind.

Imagine a future where every building we work on is not only designed to be beautiful and sturdy but also avoids going over budget, and running costs and energy usage are kept low long after it's built. One where builders have a say in how a project is designed, infrastructure is built before it's needed, workplace accidents are almost nil and no one has to rebuild something because a client isn't happy.

Sounds like a dream – but those of us using BIM are already one step closer to making it a reality.
