Building Basics Series: Lightweight steel framing (2nd edition)

[View on Information Provider website](#)

Abbreviation
BK202(2019)
Version
Second edition
Valid from
21/02/2019

Information provider
BRANZ Limited
Information type
Building Basics
Format
PDF, Hard copy

Description

The aim of this Building Basics: Lightweight Steel Framing 2nd edition guide is to provide easy-to-follow practical design and construction information for designers, builders and building consent authorities (BCAs) who are unfamiliar with lightweight steel framing. This second edition has been updated and revised to align with the most recent standards from the National Association of Steel Framed Housing (NASH).

Scope

This guide covers:

- statutory requirements
- steel framing materials
- thermal breaks
- the fabrication process
- design and erection
- roof and wall underlays
- windows and external doors
- wall claddings
- roof claddings
- insulation
- wiring and piping installation
- internal fit-out.
