BS 4461:1978 Specification for cold worked steel bars for the reinforcement of concrete

[View on Information Provider website](#)

Abbreviation

BS 4461:1978

Valid from

31/05/1978

Information provider

British Standards Institution

Author

British Standards Institution

Information type

British Standard

Format

PDF

Cited By

[This resource is cited by 1 document \(show Citations\)](#)

Description

Requirements for rolled steel bars other than plain round bars that have been cold worked to such an extent that their yield point has been eliminated.

Covers deformed high yield steel bars in grade 460 only and gives weldability requirements.

Does not include bars for use as lifting hooks for reinforced concrete members.

For assistance with locating previous versions, please contact the information provider.
