Description

BS 5839-1:2002+A2:2008 sets the standard for fire detection and alarm systems in non-residential buildings. This code of practice gives essential guidance on effective design, installation and maintenance. And these are the latest recommendations on protecting your organization through fire detection and prevention. BS 5839-1:2002+A2:2008 applies to all fire alarm systems, from small manual networks to complex automated systems.

Best practice guidelines cover:

- fire extinguishing equipment
- smoke control
- automated door release
- and other critical safety measures.

Guidance on fire detection and alarm systems in residential buildings is given in BS 5839-6.
