Description

BS 5839 gives best-practice recommendations for the design and installation of fire alarms and fire detectors in buildings. This includes domestic facilities designed to accommodate a single family. The standard covers both new and existing buildings, and looks at how changes in technology, custom and practice, and the guidance that supports building regulations, influence fire safety. The specifications set out in BS 5839 refer mainly to fire detection and fire alarm systems installed to ensure life safety.
