BS 6068-2.37:1990 Water quality. Physical, chemical and biochemical methods. Method 2.37: Method for the determination of chloride via a silver nitrate titration with chromate indicator (Mohr's method)

[View on Information Provider website](#)

Abbreviation

BS 6068-2.37:1990

Valid from

30/09/1990

Information provider

Standards New Zealand

Author

British Standards Institution

Information type

British Standard

Format

PDF

Cited By

[This resource is cited by 2 documents \(show Citations\)](#)

Description

Applicable to waters that are not heavily polluted and of low chloride content. For chloride concentrations from 5 mg/l to 150 mg/l.
