# BS 6068-2.40:1991 Water quality. Physical, chemical and biochemical methods - Method 2.40: Method for the determination of borate by spectrometry using azomethine-H

View on Information Provider website {{ linkText }}

Abbreviation BS 6068-2.40:1991 Valid from 28/06/1991

Information provider Standards New Zealand Author British Standards Institution Information type British Standard Format PDF

Cited By <u>This resource is cited by 2 documents (show Citations)</u>

#### Description

Applicable to concentrations between 0.01 mg and 1 mg of boron per litre in potable water and in ground, surface and saline waters that are not heavily polluted.
