BS 8007:1987 Code of practice for design of concrete structures for retaining aqueous liquids

[Download this resource \(PDF, 49KB\)](#)

Abbreviation

BS 8007:1987

Valid from

30/10/1987

Information provider

British Standards Institution

Author

British Standards Institution

Information type

British Standard

Format

PDF

Cited By

[This resource is cited by 2 documents \(show Citations\)](#)

Description

This British Standard provides recommendations for the design and construction of normal reinforced and prestressed concrete structures used for the containment or exclusion of aqueous liquids.

The term “liquid” in this code of practice includes any “contained or excluded aqueous liquids but excludes aggressive liquids.

Scope

The standard does not cover dams, pipes, pipelines, lined structures, or the damp-proofing of basements.

The term “structure” is used to mean the vessel that contains or excludes the liquid, and includes tanks, reservoirs, and other vessels.
