Description

BS EN 10021:2006 is a European standard that specifies the general technical delivery conditions for all steel products covered by BS EN 10079 with the exception of steel castings and powder metallurgical products.

Where the delivery requirements agreed for the order or specified in the appropriate product specification differ from the general technical delivery conditions defined in this European Standard, then the requirements agreed for the order or specified in the appropriate product specification apply.

For assistance with locating previous versions, please contact the information provider.

Notes/comments

BS EN 10021:2006 is the British Standards version of the European Standard and is referenced as the English language version applicable to this International Standard.
