### Description

This European Standard, a part of the EN 50133 series, specifies requirements for automated access control systems and components in and around buildings.

### It includes:

- system architecture and general requirements of an access control system for security applications;
- requirements for functions;
- definition of the environmental and electromagnetic compatibility conditions;
- requirements for communication of an access control with others, such as access point actuators and sensors, alarm system, etc.

This standard does not apply to access point actuators and sensors.
