Description

This European Standard specifies the requirements, test methods and performance criteria for fire alarm sounders in a fixed installation intended to signal an audible warning of fire between a fire detection and fire alarm system and the occupants of a building.

It is intended to cover only those devices which derive their operating power by means of a physical electrical connection to an external source such as a fire alarm system.

This standard specifies fire alarm sounders for two types of application environment,

- type A for indoor use and
- type B for outdoor use.

This standard is not intended to cover:

- loudspeaker type devices primarily intended for emitting emergency voice messages;
- supervisory sounders, for example, within the control and indicating equipment.
