Description

EN 60584-1 Thermocouples - Part 1: Reference tables - Establishes a set of reference tables for the seven most commonly used types of commercially available thermocouples, giving both electromotive force as a function of temperature and temperature as a function of electromotive force. It gives polynomial expressions from which the reference values can be computed. The reference tables are based on fundamental research and are consistent with the current edition of the International Practical Temperature Scale (1968) and are not limited to applications in the field of industrial process measurement and control.

For assistance with locating previous versions, please contact the information provider.

Notes/comments

Note: This European Standard is identical to British Standard BS EN 60584-1:1996 and IEC 60584-1:1995
