Description

BS EN 60584-1 is an International Standard that relates to electromotive force (hereafter abbreviated as EMF) generated by the designated thermocouple types to temperature, based upon the International Temperature Scale of 1990 (ITS-90).

The reference polynomials for Types R, S, B, J, T, E, K and N are those used in the previous edition of this standard, IEC 60584-1:1995

Scope

For assistance with locating previous versions, please contact the information provider.

Notes/comments

Note: This European Standard is identical to British Standard BS EN 60584-1:1996 and IEC 60584-1:1995
