## BS EN 752-6:1998 Drain and sewer systems outside buildings - Part 6: Pumping installations

[View on Information Provider website](#)

### Abbreviation

BS EN 752-6:1998

### Valid from

15/09/1998

---

### Information provider

Standards New Zealand

### Author

British Standards Institution, European Standardization Organisations

### Information type

British Standard

### Format

PDF

---

### Cited By

[This resource is cited by 1 document \(show Citations\)](#)

### Description

This European Standard sets out the principles for the planning and design of pumping installations for drain and sewer systems which otherwise operate essentially under gravity.

This European Standard is applicable to drain and sewer systems, which operate essentially under gravity, from the point where the sewage leaves a building or roof drainage system, or enters a road gully, to the point where it is discharged into a treatment works or receiving water.

Drains and sewers below buildings are included provided that they do not form part of the drainage system of the building.

For pumping installations for pressurized drainage systems BS EN 1671 applies.

For assistance with locating previous versions, please contact the information provider.

### Notes/comments

BS EN 752-6:1998 is the British Standards version of the European Standard and is referenced as the English language version applicable to this International Standard.
