BS EN 81-2:1998 Safety rules for the construction and installation of lifts - Part 2: Hydraulic lifts

View on Information Provider website {{ linkText }}

Abbreviation

Citations

BS EN 81-2:1998

Valid from

15/11/1998

Information provider

SAI Global

Author

British Standards Institution,

European Committee for Standardization

Information type

British Standard

Format

PDF, Hardcopy

Cited By

This resource is cited by 1 document (show Citations)

Description

This Standard covers the safety rules for the construction and installation of hydraulic lifts. It includes information on lift wells, machinery and pulley spaces, landing doors, as wall as cars and their balancing weight. It also sets the benchmark for suspension, guide rails, buffers and final limit switches. Other topics include electric installations and appliances, protection against electric faults, notices, markings, and examinations and tests.

For assistance with locating previous versions, please contact the information provider.

Notes/comments

BS EN 81-2:1998 is the British Standards version of the European Standard and is referenced as the English language version applicable to this International Standard.
