## BS EN 81-58:2003 Safety rules for the construction and installation of lifts. Examination and tests. Landing doors fire resistance test

[View on Information Provider website](#)

### Abbreviation

BS EN 81-58:2003

### Valid from

28/07/2003

---

### Information provider

British Standards Institution

### Author

British Standards Institution  
European Committee for Standardization

### Information type

British Standard

### Format

PDF

---

### Cited By

### Description

This European Standard specifies the method of test for determining the fire resistance of lift landing doors which may be exposed to a fire from the landing side. The procedure applies to all types of lift landing doors used as a means of access to lifts in buildings and which are intended to provide a fire barrier to the spread of fire via the lift well.

The procedure of this standard allows for the measurement of integrity and if required the measurement of radiation and thermal insulation.

For assistance with locating previous versions, please contact the information provider.

### Notes/comments

**Note:** BS EN 81-58:2003 is the British Standards version of the European Standard EN 81-58:2003.
