## BS EN ISO 527-5:1997 Plastics. Determination of tensile properties. Test conditions for unidirectional fibre-reinforced plastic composites

[View on Information Provider website](#)

### Abbreviation

BS EN ISO 527-5:1997

### Valid from

15/07/1997

---

### Information provider

British Standards Institution

### Author

British Standards Institution,  
European Committee for Standardisation,  
International Organisation for Standardization

### Information type

British Standard

### Format

PDF

---

### Cited By

[This resource is cited by 1 document \(show Citations\)](#)

---

### Description

This standard specifies the test conditions for the determination of the tensile properties of unidirectional fibre-reinforced plastic composites. The method is suitable for all polymer matrix systems reinforced with unidirectional fibres. The method is suitable for composites with either thermosetting or thermoplastic matrices, including preimpregnated materials. The reinforcements covered include carbon fibres, glass fibres, aramid fibres and other similar fibres.
