DriStud Cool Window Flashing Tape

[View on Information Provider website](#) [Download this resource \(PDF, 226KB\)](#)

Abbreviation

CM70022

Valid from

31/10/2019

Information provider

Ministry of Business, Innovation and Employment

Author

Bureau Veritas

Information type

Product Certificate (CodeMark)

Format

PDF

Description

DriStud Cool Window Flashing Tape is a self-adhesive, pressure sensitive, polyethylene membrane material tape with a release backing.

It is branded with the DriStud Cool Tape branding.

Scope

DriStud Cool Window Flashing Tape is intended for use in new and existing buildings in conjunction with an underlay or rigid air barrier. It is used around framed joinery openings and penetrations, providing a secondary weather resistant barrier.

It is designed to be used in conjunction with air seals and joinery flashing systems, but not as a substitute.

DriStud Cool Window Flashing Tape may also be used at joinery heads to seal flashing upstands to the building wrap. Where a rigid underlay has been installed, DriStud Cool Window Flashing Tape may be used to seal all junctions and penetrations. It is suitable for use with timber and steel framed buildings as well as masonry structures. It may be used where the environment temperature fluctuates between -28°C to 80°C.
