DriStud Bozz Window Flashing Tape

[View on Information Provider website](#) [Download this resource \(PDF, 360KB\)](#)

Abbreviation

CM70063

Valid from

31/10/2019

Information provider

Ministry of Business, Innovation and Employment

Author

Bureau Veritas

Information type

Product Certificate (CodeMark)

Format

PDF

Description

DriStud Bozz Window Flashing Tape is a self-adhesive, pressure sensitive, polyethylene membrane material tape with a release backing. The tape is branded with the DriStud Bozz Window Flashing Tape branding and logo.

Scope

DriStud Bozz Window Flashing Tape is intended for use in new and existing buildings in conjunction with an underlay or rigid air barrier.

It is used around framed joinery openings and penetrations, providing a secondary weather resistant barrier. It is designed to be used in conjunction with air seals and joinery flashing systems, but not as a substitute.

DriStud Bozz Window Flashing Tape may also be used at joinery heads to seal flashing upstands to the building wrap.

Where a rigid underlay has been installed, DriStud Bozz Window Flashing Tape may be used to seal all junctions and penetrations. It is suitable for use with timber and steel framed buildings as well as masonry structures.
