Description

Verification Method D1/VM1 provides a means of measuring slip resistance to determine compliance with Building Code Clause D1 Access Routes.

This clause outlines the requirements for safety of entry/exit to the building and the safety of any internal or external stairs.

It ensures people can move safely into, within and out of buildings. Access routes include the approach to the main entrance of a building, corridors, doors, stairs, ramps and lifts.

It sets out requirements for:

- slip resistance, stair treads, handrails and cross falls
- people with disabilities to carry out normal functions within buildings
- the movement, loading and parking of vehicles.

For assistance with locating previous versions, please contact the information provider.
