European Standardization Organisations

Information type

Standard

Format

PDF

Description

This European Standard applies to concrete for structures cast in situ, precast structures and structural precast products for buildings and civil engineering structures.

It specifies requirements for the constituent materials of concrete, properties of fresh and hardened concrete and verification of these properties, limitations for concrete composition, specification of concrete, delivery of fresh concrete, production control procedures and conformity criteria and evaluation of conformity.

For assistance with locating previous versions, please contact the information provider.

Notes/comments

Note: BS EN 206-1:2000 is listed as the equivalent British Standard of this European Standard (EN 206-1:2000).
