Description

Verification Method G13/VM4 provides a means of compliance with Building Code Clause G13 Foul Water for on-site disposal. Code clause G13 requires the safe disposal of foul water to prevent illness and the loss of amenity due to odour and accumulated matter.

Scope

This document describes the design methods for systems used for the collection, storage, treatment and disposal of foul water. A design method and construction details given in sections 5.1 to 5.5 and 6.1 to 6.2 of AS/NZS 1547: 2012 (and the appendices referred to in these sections), for the treatment of domestic foul water for flow rates up to a maximum 14,000 litres/week from a population equivalent of up to 10 persons, may be verified as satisfying the performance criteria of G13 Foul Water.
