Pineclad & Pinetrim XT – Vertical Weatherboard External Cladding System

[View on Information Provider website](#) [Download this resource \(PDF, 363KB\)](#)

Abbreviation
GM-CM30106
Valid from
10/05/2019

Information provider
Ministry of Business, Innovation and Employment
Information type
Product Certificate (CodeMark)
Format
PDF

Description

The Pineclad and Pinetrim XT Vertical Weatherboard External Cladding System comprise timber weatherboards, fascia boards, moulding profiles and castellated cavity battens manufactured from finger-jointed, glue laminated, clear radiate pine.

Pineclad is manufactured in New Zealand from locally sourced timber, Pinetrim XT is manufactured in China from timber sourced from other countries including New Zealand.

Pineclad and Pinetrim XT are treated to hazard class H3.1 with a light organic solvent preservative (LOSP).

Pineclad components are pre-sanded and primed with an oil-based primer ready for top coating with a high-grade acrylic, two coat system. Pinetrim XT components are pre-sanded and painted with an acrylic primer and undercoat system ready for top coating with a high-grade acrylic, two coat system.

Pineclad and Pinetrim XT are standard 18 mm thick weatherboards, in the following widths and profile:

- Shiplap 135 & 180mm
- Fascia boards and moulding profiles are also available in a range of sizes and profiles

For assistance with locating previous versions, please contact the information provider.
