Description

Provides guidance which is applicable to a third-party product certification system for determining the conformity of a product with specified requirements by assessment and surveillance of the quality system and testing of samples of the product.

Identical with and reproduced from ISO/IEC Guide 28:2004.

Scope

This Guide gives general guidelines for a specific product certification system.

It is applicable to a third-party product certification system for determining the conformity of a product with specified requirements through

- initial testing of samples of the product,
- assessment and surveillance of the involved quality system, and
- surveillance by testing of product samples taken from the factory or the open market, or both.

This Guide addresses conditions for use of a mark of conformity and conditions for granting a certificate of conformity.

This system corresponds to system 5 product certification system as described in ISO/IEC Guide 67.

A model checklist of requirements for a third-party certification system is given in Annex A.

For assistance with locating previous versions, please contact the information provider.

Notes/comments

Identical with and reproduced from ISO/IEC Guide 28:2004.
