IEC 60227-1:1993 Polyvinyl chloride insulated cables of rated voltages up to and including 450/750 V - Part 1: General requirements

[View on Information Provider website](#)

Abbreviation

IEC 60227-1:1993

Valid from

15/02/1993

Information provider

International Electrotechnical Commission

Author

International Electrotechnical Commission

Information type

IEC Standard

Format

PDF

Cited By

Description

This Standard gives definitions. Specifies marking, core identification and general requirements for the construction of cables. Appendix describes code designation of cables. Applies to rigid and flexible cables with insulation, and sheath if any, based on polyvinyl chloride, of rated voltages U_0/U up to and including 450/750 V used in power installations of nominal voltage not exceeding 450/750 V a.c.
