Description

This standard establishes the dimensional, mechanical, and performance requirements of inch series break mandrel blind rivets suitable for use in joining the component parts of an assembly. A metric series counterpart standard is in existence under designation IFI-505.

For assistance with locating previous versions, please contact the information provider.

Notes/comments

Note: This Standard has been referenced in AS/NZS 4600:2005 as American Welding Society publication AWS F114.
