## ISO 11357-6:2002 Plastics - Differential scanning calorimetry (DSC) - Part 6: Determination of oxidation induction time

[View on Information Provider website](#)

### Abbreviation

ISO 11357-6:2002

### Amendment

ISO 11357-6:2002/Amd 1:2007

### Valid from

01/05/2002

### Description

This part of ISO 11357 specifies a method for the determination of the oxidation-induction time (OIT) of polymeric materials by differential scanning calorimetry (DSC). It is applicable to polyolefin resins that are in a fully stabilized/compounded form, either as raw materials or as finished products. It may be applicable to other plastics.
