ISO 11432:1993 Building construction - Sealants - Determination of resistance to compression

[View on Information Provider website](#)

Abbreviation
ISO 11432:1993
Valid from
01/04/1993

Information provider
International Organisation for Standardization
Author
International Organisation for Standardization
Information type
ISO Standard
Format
PDF

Cited By
[This resource is cited by 1 document \(show Citations\)](#)

Description

The principle of the method specified is preparing test specimens in which the sealant to be tested adheres to two parallel contact surfaces, compressing the test specimens to a defined value under defined conditions and recording the applied force and the resulting stress.
