## ISO 15874-5:2013 (R2017) Preview Plastics piping systems for hot and cold water installations - Polypropylene (PP) - Part 5: Fitness for purpose of the system

[View on Information Provider website](#)

### Abbreviation

ISO 15874-5:2013

### Amendment

ISO 15874-5:2013/DAmD 1

### Valid from

14/02/2013

### Replaces

---

### Information provider

Standards New Zealand

### Author

International Organisation for Standardization

### Information type

ISO Standard

### Format

PDF, Hard copy

### Description

ISO 15874-5:2013 specifies the characteristics of the fitness for purpose of polypropylene (PP) piping systems, intended to be used for hot and cold water installations within buildings for the conveyance of water, whether or not intended for human consumption (domestic systems) and for heating systems, under design pressures and temperatures according to the class of application.

It covers a range of service conditions (classes of application) and design pressure classes.

It also specifies test parameters for test methods.

In conjunction with the other parts of ISO 15874, it is applicable to PP pipes, fittings, their joints and to joints with components of other plastics and non-plastics materials intended to be used for hot and cold water installations.
