ISO 6957:1988 Copper alloys - Ammonia test for stress corrosion resistance

[View on Information Provider website](#)

Abbreviation

ISO 6957:1988

Valid from

15/09/1988

Information provider

International Organisation for Standardization

Author

International Organization for Standardization

Information type

ISO Standard

Format

PDF

Cited By

Description

Specifies a test, using an ammoniacal atmosphere, for the detection of applied or residual stresses which can cause failure of the material in service or storage through stress corrosion cracking. The severity of the method can be regulated by changing the pH value. In an informative annex, recommendations are given for the choice of pH-values.
