ISO 7887:1994 Water quality - Examination and determination of colour

[View on Information Provider website](#)

Abbreviation

ISO 7887:1994

Valid from

25/08/1994

Information provider

Standards New Zealand

Author

International Organization for Standardization

Information type

ISO Standard

Format

PDF

Cited By

[This resource is cited by 1 document \(show Citations\)](#)

Description

This Standard cancels and replaces the first edition (1985).

It specifies three methods for the examination of colour:

- a method for the examination of apparent colour by visually observing a water sample in a bottle;
- a method for the determination of the true colour of a water sample using optical apparatus;
- a method for the determination of the colour by visual comparison with hexachloroplatinate standard solutions.

Under certain circumstances, strongly coloured water samples need to be diluted before examination or determination.
